

UK Sovereign Cloud™

The Ultimate in
Security Assurance.

A UK Dedicated Alternative

The pandemic and pace of technical change in the last few years have flipped the script on IT and turned cloud into the platform of choice for mission critical business systems and crown jewel data. Introducing UK Sovereign Cloud. Designed with data sovereignty and compliance at its core, built and assured using CSA CAIQ v4 – the gold standard for Cloud Security Assurance.

Ensuring data privacy and compliance for your business

SovereignCloud is the a UK dedicated, fully assured sovereign cloud, compliant with UK Data Protection Act 2018, Part 3 for Law Enforcement processing. Sovereignty is knowing where your data is, the jurisdiction that applies, and you can maintain control of your data at all times. Take comfort in knowing your data will never leave the UK without your express permission, protecting your commercial interests underpinned with compliance.

Privacy and security at its core with multi-channel capability allowing for controlled isolation from any existing Hyperscale commercial cloud services. Managed and operated by UK Citizens with SC Clearance and Police Vetting (NPPV L3), hosted in assured secure UK data centres.

A complete cloud infrastructure platform, with optional 'add-ons' to suit your multi-cloud business strategy.
